Commissioner Whetstone seconded the motion and the motion was approved unanimously 3-0-0.

Mike Graham also presented Exhibit C, Form of Grant Easement, for the Communications Center relative to real estate in Liberty Township, Hendricks County, Indiana.

Mike Graham reported the Communications Center is establishing a network of antennas to improve public safety communications. The antennas will be located in Brownsburg, Plainfield and Belleville. The telecommunications signal between these towers requires a clear line of sight. He stressed we need to make sure no structures are built high enough to interfere with the signal. The Communications Center is seeking the establishment of an overlay zoning district to require additional review, or any proposed structure greater than 50 feet in height, to determine if there would be interference with the telecommunications signal. The overlay district would be along a defined corridor and would not be a blank district for the entire County. It would be similar to the existing Airspace Overlay District. Mr. Graham recommended requesting the Hendricks County Area Plan Commission and their staff to prepare a proposed emergency telecommunications overlay district, conduct a public hearing and make a recommendation to the County Commissioners for their consideration of establishing the overlay district. Also, the overlay district should be developed with the input and cooperation of the Hendricks

County Communications Center, Executive Director. He presented a model ordinance to be used as a guide by the County, Avon, Brownsburg and Plainfield. Commissioner Whetstone gave a brief history of the need for establishing an overlay and reported the Communications Center Governing Board voted unanimously to direct the Plan Commission in drafting a proposed overlay district, conduct a public hearing and bring a recommendation back to the Commissioners.

John Ayers reported the Avon Town Council has agreed to share the cost of CR 625E / US 36 improvements with the County 50/50 and noted the current construction estimate is approximately \$200,000. He explained Avon currently has an engineer under contract for their trail design on this road (United Consulting Engineers) and it would make sense to use them for this intersection as well. He suggested the County portion of this road project be funded from EDIT. Commissioner Palmer moved to approve United Consulting to design the road improvements at CR 625E and US 36 and to fund from EDIT, as recommended by the County Engineer.

Pittsboro had scheduled a public hearing on these proposed road closings, however, it was postponed. He stated the County has no significant interest in these roads.

There was discussion of the proposed closings. The Commissioners directed John Ayers to use his own judgment if there is a need to plan any additional meetings after he has further talked with the town representatives relative to these road closures.

IN THE MATTER OF ROOFING COUNTY BUILDINGS

Kevin Cavanaugh advised the need for roofing repairs to the Government Center, Courthouse Annex and Museum. He explained all roofing proposals were from Blackmore and Buckner Roofing and they have been a proven low bidder on previous County projects and are an approved Garland Roofing Materials contractor. He noted we purchase Garland materials at a 40% discount through the US Communities mass purchasing program. He explained the needed repairs and cost for each building:

Mike Graham explained Crown Castle currently has a 25 year ground lease with the County for the cell tower at the Highway Garage. The effective date of the lease was May 5, 1997 and the lease expires in 2022. Crown Castle is interested in renegotiating the lease now because the normal timeline is 2 -3 years to build a new tower. The original lease was for a \$1.00/year with the rights of the Sheriff's Department to use the tower for placement of their antennas and other considerations. He noted in a 2000 amendment made to the lease establishing a base rate of \$6,000 plus an annual increase of 3%. Also, under the 2000 amendment the County receives 10% of the annual revenue for additional cell companies who rent space on the tower. The total estimated income for 2015 is \$22,615. Mr. Graham explained a chart showing the Current, the 1st Proposed Adjustment from Crown Castle, the recommendation from our Consultant John Apolzan and the Revised Proposal from Crown Castle. He advised if the Revised Proposal from Crown Castle is accepted, which is not much different than the 1st proposal, the County will make an additional \$32,410 during the next 5 years over the current lease agreement and the total tower income to the County will be \$115,140 during the next 5 year period if the County accepts Crown Castle's proposal and stressed the most important variables are the annual % increase lease term. documents in detail. There was discussion of the rate and time. Commissioner Whetstone recommended a lease for 20 years at 5%. The Commissioners directed Mike Graham to take these figures back to Crown Castle for their consideration.
